

RABBIT R&D WEBINAR

WEDNESDAY 19TH MARCH 2025 ON ZOOM

TIME: 2:00 – 4:00 PM (AEDT)

Hosted by the Centre for Invasive Species Solutions and Foundation for Rabbit-Free Australia, this annual free webinar will explore the cutting-edge field of gene-drive technology. The event aims to bring together researchers, practitioners, and communities to foster understanding and informed discussions about this promising new-tech approach to rabbit control.

Join Us for an Informative Webinar on Gene-Drive Technology

AGENDA:

Topic

Welcome
Introduction to gene-drive technology
A gene-drive for rabbit control
Dispersal of a gene-drive for rabbit control
Risk management for gene-drives
Best practice rabbit control
The way forward
EmCee & Q&A

Speakers

Shauna Chadlowe
Prof. Paul Thomas
Dr Tanja Strive & Dr Sarah Topfer
Dr Kevin Oh & Dr Heng Lin Yeap
Dr Tanja Strive & Dr Aditi Mankad
Nigel Roberts & Heidi Kleinert
Craig Magnussen
Assoc Prof Richard Price

The organisations represented by our speakers

Register to attend [via this link.](#)

Why Attend?

- Gain insights into the latest advancements in rabbit control technology.
- Participate in live Q&A sessions with leading experts.
- Access valuable online reference materials post-event.

Key Messages:

- The research is complex, but the basics are straightforward.
- It requires time, money, and carries risks, but the technology is feasible and manageable.
- While promising, it's challenging and not a 'silver bullet.' Traditional rabbit management and ongoing research remain crucial.

For questions, please contact Rabbit-Free Australia via the [Contact Us](#) page.
